Portfolio Update

General Fund Portfolio

- The portfolio is in compliance with the California Government Code and the District's Investment Policy.
- The portfolio remains well diversified with holdings of U.S. Treasuries, federal agencies, negotiable certificates of deposit, high-quality corporate notes, municipals, supranationals, asset-backed securities (ABS), Local Agency Investment Fund (LAIF), and the California Asset Management Program (CAMP).

General Fund June Trade Activity

- The District's portfolio management team continues to monitor the markets for opportunities to prudently enhance interest earnings while maintaining the foremost focus on safety and liquidity.
- The Treasury yield curve rose slightly along most tenors in August. Benchmark U.S. Treasuries for 3-month, 3-year, and 5-year maturities finished the month at 5.44%, 4.55%, and 4.25%, moving up 4 bps, 3 bps, and 8 bps, respectively.
- During the month, PFMAM bought over \$3.8 million in Commercial Paper, \$4.4 million in Asset-Backed Securities, \$5.0 million in Corporate Notes, and \$5.4 million in Federal Agency Commercial Mortgage-Backed Securities. All the purchases for the General Fund totaled \$18.6 million.

Outlook

- Treasury yields ended the month up modestly as the markets speculated on the direction of future Federal Reserve actions based on the latest economic releases. The 3-month U.S. Treasury was up 4 basis points to end the month at 5.44% while the 5-year U.S. Treasury was up 8 basis points to end the month at 4.25%.
- Economic data released during the month did not suggest any significant change in Fed policy. The rate of inflation was relatively unchanged. On a year-over-year basis (YoY), headline CPI rose by 0.2% to 3.2% as of July while core CPI was down by 0.1% to 4.7% as of July. On a Month-over Month basis, headline and core CPI were both unchanged at 0.2%.
- The labor market remains a tailwind for the U.S. economy, but at a moderating pace. Non-farm payrolls increased by 187,000 in August, which remains above the roughly 100,000 jobs per month estimated to maintain full employment. However, the employment numbers for June and July were revised downward by a combined 110,000 jobs. The unemployment rate ticked up to 3.8%. The increase in the unemployment rate was due in large part to women and individuals 55+ years old returning to the workforce.
- There was no FOMC meeting in August. The next FOMC meeting is on September 19-20th. Recent speeches by Federal Reserve members appear to suggest that any further rate hikes will be data dependent, but that no cuts are expected until sometime in 2023. Based on Fed Funds futures, the markets expect the Federal Reserve to leave rates unchanged at the September meeting but that a rate hike is still considered a possibility at the November meeting.
- In the current environment, PFMAM continues to manage the District's portfolio to meet its objectives of safety, liquidity, and return. Within this framework, diversification across permitted investments will remain a key element of PFMAM's strategy. We will continue to allocate to credit and other spread products where appropriate to prudently capture incremental value and long-term return potential.
- Our current views on various sectors of the high-quality fixed income markets are described below:
 - **Short-term credit** markets (commercial paper and bank certificates of deposit) offer attractive absolute yields with levels approaching 6% in the 1-year maturity range, as well as decent yield pickups over government securities.
 - **Corporate** spreads widened slightly in August but remain shy of their 12-month average levels while elevated from a five year historical look-back. As credit fundamentals remain stable and the economic outlook is positive, we continue to overweight corporate allocations in portfolios. High yields and reasonable yield spreads provide a decent income cushion against potential spread widening should conditions begin to deteriorate.
 - **Asset-backed security** (ABS) spreads remained relatively unchanged in August. Amid tighter lending standards, strong demand from investors, and lower rate volatility, we expect this to be supportive of the sector over both the near- and medium-term.
 - **Mortgage-backed securities** (MBS) underperformed in August as spreads widened across all collateral types and coupons. High quality agency-backed supply is expected to remain elevated as banks lighten balance sheet exposure, providing opportunities to selectively add to portfolios at attractive levels.
 - **Agency, supranational, and municipal** spreads remain tight and new issue buying opportunities have been limited. Deeply discounted low-coupon callable agencies are one area of value.

Market prices are derived from closing bid prices as of the last business day of the month as supplied by Refinitiv or Bloomberg. Prices that fall between data points are interpolated.

Market value for LAIF is derived from the NAV posted quarterly on the LAIF website.

In June 2020, the Local Agency Investment Fund (LAIF) authorized the establishment of a secondary LAIF account under the authority of the Coronavirus Aid, Relief and Economic Security (CARES) Act, subject to certain restrictions. Funds on deposit in the secondary LAIF account are subject to a separate \$75 million limit. Thus, the current LAIF limit for the District's aggregate funds, including the secondary LAIF account may be \$150 million.
