Portfolio Update

General Fund Portfolio

- The portfolio is in compliance with the California Government Code and the District's Investment Policy.
- The portfolio remains well diversified with holdings of U.S. Treasuries, federal agencies, negotiable certificates of deposit, high-quality corporate notes, municipals, supranationals, asset-backed securities (ABS), Local Agency Investment Fund (LAIF), and the California Asset Management Program (CAMP).

General Fund February Trade Activity

- The District's portfolio management team continues to monitor the markets for opportunities to prudently enhance interest earnings while maintaining the foremost focus on safety and liquidity.
- The Treasury yield curve fell across most tenors in February. Benchmark U.S. Treasuries for 3-month, 3-year, and 5-year maturities finished the month at 5.38%, 4.41%, and 4.24%, with the 3-month maturity moving up 2bps, as the 3 and 5-year moved down 43 bps and 41 bps, respectively.
- During the month, PFMAM bought \$5.3 million in Corporate Securities, \$4.7 million in Federal Agency Commercial Mortgage-Backed Securities \$3.2 million in U.S. Treasury Securities, and \$2.3 million in Certificate of Deposit Securities. The purchases for the General Fund totaled \$15.5 million.

Outlook

- The market spent the majority of February adjusting its expectations as strong economic data and Fed commentary pushed back on the notion that a rate cut was imminent. Fed funds futures now show the market expects the first rate cut to occur in June or July, a delay from original expectations entering the month for May to mark the start of the easing cycle. Market expectations are now more closely aligned to Fed forecasts from the December FOMC meeting as it expects 3 or 4 total cuts in 2024—down from the 5 or 6 originally priced in for this year.
 - We continue to prefer a neutral duration stance relative to benchmarks as the risk from falling yields now outweighs the potential for further yield increases.
 - The yields on benchmark 2-year, 5-year, and 10-year U.S. Treasuries jumped over the month, ending at 4.62%, 4.24%, and 4.25%, respectively, representing increases of +41, +40, and +34 basis points for the month.
 - The increase in yields over the month resulted in bond returns that were firmly negative with the longest-duration strategies performing the worst. The ICE BofA 2-, 5-, and 10-year Treasury indices returned -0.47%, -1.45%, and -2.06%, respectively.
- Our current views on various sectors of the high-quality fixed income markets are described below:
- **Short-term credit** (commercial paper and negotiable CDs) Short-term money markets continue to benefit from high yields and a patient Fed. Short-term credit remains an attractive alternative to similar maturity U.S. Treasuries, despite modestly narrower spreads over the past several months.
 - **U.S. Treasuries:** on maturities greater than one year increased through February as markets adjusted their rate cut assumptions. Short-term yields remained above 5% as Fed rate policy was unchanged, resulting in the yield curve remaining deeply inverted.
 - **Federal Agencies and Supranationals:** Spreads on federal agencies and supranationals remained anchored over the month. While agency debt issuance has been light over the past several months, record issuance from supranationals to kickstart the year was met with strong demand.
 - **IG Corporates:** Broad risk-on rallies continued in investment grade corporates as the sector generated positive excess returns and buoyed portfolio performance. Spreads on most corporate issuers have now broken through their 12-month lows. As a result, we may use this as an opportunity to book gains and exercise patience for better entry points. Year-to-date issuance in the sector has occurred at a record pace, presenting sporadic opportunities to participate in new issues with attractively priced concessions to the secondary market.
 - **Asset-Backed Securities (ABS):** Performed exceedingly well as spreads continued to grind tighter. Issuance remains quite robust and new deals have been met with strong demand and oversubscriptions, contributing to the spread tightening observed over the month..
 - **Mortgage-Backed Securities:** Underperformed through February, largely on the heels of the marked back-up in longer-term Treasury yields. Agency-backed CMBS generated positive excess returns for the month, which proved to be an exception relative to more rate-sensitive residential MBS.

Market prices are derived from closing bid prices as of the last business day of the month as supplied by Refinitiv or Bloomberg. Prices that fall between data points are interpolated.

Market value for LAIF is derived from the NAV posted quarterly on the LAIF website.

In June 2020, the Local Agency Investment Fund (LAIF) authorized the establishment of a secondary LAIF account under the authority of the Coronavirus Aid, Relief and Economic Security (CARES) Act, subject to certain restrictions. Funds on deposit in the secondary LAIF account are subject to a separate \$75 million limit. Thus, the current LAIF limit for the District's aggregate funds, including the secondary LAIF account may be \$150 million.
