Position Summary
Under general supervision of the Information Systems Manager, this position is responsible for optimal and secure operation of the District’s data communications network. The District’s data communication network includes multiple core switches, departmental switches, routers, wireless access points, firewalls, VOIP and cabling in 30 buildings. New projects will add to these totals. The Network Administrator must be able to identify needs, upgrades and implementation of new technology as needed to support the various responsibilities of this position. Responsibilities include installation, configuration, monitoring and maintenance of wireless environment, switches, routers, firewalls, NAC, extranet connections and other LAN and WAN communications and equipment. This position uses District maintenance contracts for maintaining network equipment and is responsible for ensuring contracts are up to date. The Network Administrator works closely with vendor and manufacturer staff to coordinate installation and maintenance projects and to determine and correct problems that may occur during start-up and operation. Consults with vendors and manufacturers regarding product compatibility and purchases, investigates user complaints of malfunctioning equipment; isolates the fault and makes repairs where appropriate, initiates trouble calls if equipment is under maintenance contract and/or purchases repair service as necessary. Position functions as Level I support and will be responsible for supporting the Help Desk resolve end-user problems. District’s network infrastructure is a 95% Cisco environment. Upgrades to network typically require off-shift work to avoid user disruption.

Essential Responsibilities
• Responsible for the Installation, configuration, monitoring and problem resolution of Network switching equipment, Network routing equipment, Network wireless equipment
• Monitors the District’s WAN Connections
• Conducts analog, digital and protocol tests of data communications channels and reconfigures and adjusts as necessary
• Maintains database of location, type, configuration and communication linkage of all nodes on the District network
• Works closely with users to determine needs and define problems; instructs users in the use of network and other data communications systems
• Maintains current knowledge of changes in the data communications field; and suggests improvements to District network and related hardware and software applications to utilize available technology and meet current user needs
• First level support of all Cisco VOIP and analog phone tickets
• Installs Cabling as needed
• Establishes and maintains effective working relationships with District employees, customers, vendors and all others contacted during the course of work using principles of excellent customer service
• Performs additional related duties as assigned
• Regular and reliable attendance and performance are required

Required Knowledge, Skills and Abilities

Working knowledge of:
• Hardware, software and networking protocols utilized in LAN, WAN and related data communication systems, including fiber optics and peripheral equipment
• LAN switch and router management via telnet and web interfaces
• Router protocols and setup thereof
• TCP/IP communication
• VLAN technology
• Basic Cisco IOS command
• Basic Nexus OS Command Line
• Use and care of tools and equipment related to the installation, troubleshooting, maintenance and upgrading of a variety of voice/data networks and communication hardware and software
• Record keeping practices and procedures
• New and existing software, applications, databases and hardware through formal and/or informal on-the job training and self-study

Ability to:
• Prioritize competing requests for service; multiple tasks; and organize schedules to meet District requirements
• Explain technical information to non-technical users
• Prepare clear, concise reports, documentation and correspondence.
• Communicate professionally and effectively, both orally and in writing
• Work professionally and productively with all encountered in the course of work, including personnel in governmental agencies, local authorities, consultants, the general public, and District staff
• Follow the safety and health rules and safe working practices applicable to the job
Minimum Qualifications

Education and/or Experience:
- Two years of college or technical school training (60 semester units or 90 quarter units) in information systems, networking, network technologies or a related field; and "hands-on" experience with personal computer applications. (Technical experience in hardware, software, and network installation and maintenance may be substituted in lieu of education on a year for year basis)
- Two years position related experience installation and repair experience with LAN and WAN equipment (which includes wiring, routers, switches, cabling, and troubleshooting of physical layer)
- Experience with Hewlett Packard Network Switches
- Desirable knowledge and/or experience on the following:
  - Knowledge of Microsoft Operating Systems up to and including Windows Server 2012 and Windows 7
  - Knowledge of Microsoft Exchange 2013 and Microsoft Office Suite
  - Experience with Citrix XenApp, XenDesktop, Netscalers
  - Experience with Next Generation Firewalls and Firepower Services
  - Experience with proxy servers, firewalls, mail spam servers and VPN servers

Required Certification and/or License:
- Cisco CCNA certification
- Must possess and maintain a current, valid California driver's license and satisfactory driving record. (Drives District vehicles to Bay Area facilities on a regular basis)

Physical Requirement:
Mobility to work in a typical office and computer room setting. Mobility and dexterity to install cables and other computer and network hardware. Strength to lift and move components weighing up to 50 pounds. Vision to read printed materials and a computer screen. Color vision to distinguished between differing wiring and cabling components. Hearing and speech to communicate in person and over the telephone. Must be willing to work extended hours or called back in emergency situations. Must be willing to be on-call (for emergencies only) on a rotating basis.
