# GOLDEN GATE BRIDGE, HIGHWAY AND TRANSPORTATION DISTRICT 

## RESOLUTION NO. 2011-076

## RECEIVE THE UPDATED FIVE- AND TEN-YEAR FINANCIAL PROJECTION FROM FY 12/13 THROUGH FY 21/22

September 9, 2011
WHEREAS, the office of the Auditor-Controller provided a report of the Golden Gate Bridge, Highway and Transportation District's (District) financial projection for the ten-year period from FY 12/13 through FY 21/22 (Projection), which report included the following sections: (1) Introduction; (2) Fiscal Strength of the District; (3) Projection Findings; (4) Assumptions; and, (5) Next Steps; as well as the following Appendices: Appendix A, Projection; Appendix B, Assumptions; Appendix C, Ten-Year Capital Plan Projection; Appendix D, Capital Contribution Calculation; and, Appendix E, Reserve Structure; and,

WHEREAS, the Projection reflects the maintenance of all current policy decisions over the period of the Projection, including current operating service levels, current capital project schedule and current revenue assumptions, and assumes that the cost will change over time with inflation and that revenues will change according to projections of traffic and transit patronage; and,

WHEREAS, the Projection presents the long-term financial impact of the present baseline level of operations; however, the Projection is not a policy document and does not represent the direction that will be set by policy decisions made by the Board of Directors in future years, including decisions to change tolls, fares, and/or service levels; and,

WHEREAS, the Finance-Auditing Committee/Committee of the Whole, at its meeting of September 8, 2011, has so recommended; now, therefore, be it

RESOLVED that the Board of Directors of the Golden Gate Bridge, Highway and Transportation District hereby receives the Updated Five- and Ten-Year Financial Projection from FY 12/13 through FY 21/22 (Projection), including the following Sections and Appendices:
a. SECTIONS
I. Introduction;
II. Fiscal Strength of the District;
III. Projection Findings;
IV. Assumptions; and,
V. Next Steps.

## RESOLUTION NO. 2011-076

BOARD OF DIRECTORS MEETING OF SEPTEMBER 9, 2011

## PAGE 2

b. APPENDICES
A. Projection;
B. Assumptions;
C. Ten-Year Capital Plan Projection;
D. Capital Contribution Calculation; and,
E. Reserve Structure.

ADOPTED this $9^{\text {th }}$ day of September 2011, by the following vote of the Board of Directors:

AYES (15): Directors Arnold, Boro, Campos, Thu, Cochran, Elsbernd, Mar, Rabbitt, Renée, Snyder, Sobel, Stroeh and Theriault; Second Vice President Grosboll; First Vice President Eddie; President Reilly
NOES (0): None
ABSENT (4): Directors Brown, Moylan and Pahre; Second Vice President Grosboll

ATTEST:
Cant Arenteno
Janet S. Tarantino Secretary of the District

Attachment: Updated Five- and Ten-Year Financial Projection

| To: | Finance-Auditing Committee/Committee of the Whole <br> Meeting of September 8, 2011 |  |
| :--- | :--- | :--- |
| From: | Joseph M. Wire, Auditor-Controller <br> Denis Mulligan, General Manager |  |
| Subject: | RECEIVE THE UPDATED FIVE- AND TEN-YEAR FINANCIAL |  |
|  |  |  |

## Recommendation

The following report is provided for informational purposes and does not require any action.

## Introduction

This report contains the financial projection for the ten-year period from FY 12/13 through FY $21 / 22$. The report is broken up into five sections;
I. Introduction
II. Fiscal Strength of the District
III. Projection Findings
IV. Assumptions
V. Next Steps
and the Appendices;
A. Projection
B. Assumptions
C. Ten-Year Capital Plan Projection
D. Capital Contribution Calculation
E. Reserve Structure

## I. Introduction

## What is a Projection?

This report contains the District's five and ten-year financial projection of operating and capital project revenues and expenses from FY 12/13 through FY 21/22. The projection reflects the maintenance of all current policy decisions -- current operating service levels, the current capital project schedule and current revenue assumptions -- over the period of the projection. It assumes that the cost will change over time with inflation and that revenues will change according to projections of traffic and transit patronage. Future policy decisions to change tolls, fares, and/or service levels are not included in this projection.

The projection presents the long-term financial impact of the present baseline level of operations. The projection is not a policy document, and therefore does not represent the future direction of the District. That direction will be set by policy decisions made by the Board in future years. Those decisions will change the direction of the Agency as compared to this projection, i.e., increase or decrease the fiscal strength of the District and, correspondingly, its ability to serve the public.

## Why is a Financial Projection Essential?

A long-term projection is essential to enable the leaders of an organization and the public it serves to understand the challenges the organization faces in the years to come. Given the capital project intensive nature of the District's business -- maintaining a $\$ 2$ billion bridge and a large fleet of buses and ferries -- the ten-year projection allows for early planning and execution of funding strategies for large capital projects. Without that advance notice and planning, it is almost impossible to fund and undertake large projects in a timely fashion.

## II. Fiscal Strength of the District

## Summary

The fiscal strength of the District is best tracked by comparing the level of reserve funds available for operating and capital with the time period necessary for the projected needs of the District to exhaust those resources. In the District's case, it is projected that the FY 11/12 Operating and Capital Budget will encumber all available capital reserve resources. This is due to large capital projects that begin in the next two years and the District's contribution to Doyle Drive.

## Reserve Level

Historically, the District has maintained reserve funds for capital projects and operating expense emergencies. The amount of these reserves has varied but adequate reserves are essential to the ability of the District to maintain its core assets -- the Bridge, the transit rolling stock and infrastructure, and District facilities -- and to survive downturns in the economy. At present, the District's reserves have increased slightly but, as mentioned above, are expected to decrease over time due to the start of several large capital projects such as Bridge superstructure rehabilitation,

Ferry float rehabilitation, communications system upgrades and, as mentioned above, the District's contribution to Doyle Drive construction.

The reserve levels for the last 20 years are displayed in the chart below.

*Estimated

The FY 11/12 Operating Budget is expected to keep the reserves constant through the year. Given the projected funding needs of the capital projects, liability and operating reserve over the next few years, all available capital reserves are expected to be allocated in FY 11/12. Additional funding for new capital projects in future years beyond FY 11/12 will need to be raised to fund the full ten-year capital plan in this projection. The projection deficit includes that necessary funding.

In addition to the Capital Project Reserves, the District holds reserves for operations, emergencies, Bridge self-insured losses, other legal liabilities and debt services reserves (See Appendix E). These reserves are not considered available for capital projects.

The District accumulates reserves through its operating budget. Those reserves are set aside until the Board allocates them to fund the District's share of the of capital projects or to cover temporary operating budget deficits. After funds are allocated by the Board, they are spent out over one to several years depending on the particular project. The following graph represents a projection of how the current total of capital reserves would be allocated (Projected Unallocated

Reserve line) and spent out (Projected Reserve Balance line) if capital projects are undertaken as laid out in the $10-$ Year Capital Plan.

## Use of Reserves to Fund Capital Projects

Current Board direction is to apply all capital project reserves to fund Capital projects in the tenyear projection period. These funds do not fully cover the District's Capital funding needs. Additional funds will need to be raised through the capital contribution transfer from the operating budget.

## How the Reserves are Funded

New reserves are accumulated if future operating budgets are balanced. In FY 11/12, the operating budget will provide approximately $\$ 18.9$ million for the capital project reserves through three mechanisms; 1) the capital contribution set aside; 2) depreciation expense; and, 3) Bridge self-insurance against losses. However, the FY 11/12 Operating budget is not balanced as it continues to generate a deficit which uses District reserves to make up for the shortfall. Ideally, the District would have no operating deficit and therefore would be able to further fund reserves for future capital projects. The tradeoffs between which capital projects to begin and when, will be made during the future year budget process. (For more information regarding the capital contribution or reserve structure, see Appendix D and E.)

## III. Projection Findings

The findings of the revised 5 and 10-year projection for revenues and expenses are summarized in the following table. A year-by-year summary table and detailed operating and capital revenue and expense tables are in the appendices.

|  | Year 1 <br> FY 2013 <br> Estimate | SubTotal <br> Year 1 - 5 <br> Estimate | Total <br> Year 1-10 <br> Estimate |
| :--- | :---: | :---: | :---: |
| Total Operating and District Capital Expense | $\$ 177$ | $\$ 955$ | $\$ 2,099$ |
| Total Operating Revenue | $\underline{\$ 169}$ | $\underline{\$ 868}$ | $\underline{\$ 1,777}$ |
| Total Operating \& Capital District Deficit | $\$ 8$ | $\$ 87$ | $\$ 322$ |

For comparison purposes, the projected 10-year deficit of \$322 million is approximately $\$ 14$ million higher than the $\$ 308$ million presented in the previous projection of September 9, 2010. The projected five-year deficit is $\$ 87$ million; $\$ 2$ million lower than the $\$ 89$ million estimate of last year. The decrease in the 5 -year projected deficit is primarily due to increases in health and pension benefit costs and slight increases in services and fuel, offset by reductions in salary due to implementation of several Financial Plan initiatives. Note: The 5 and 10-year projected deficits, excluding the contribution to Doyle Drive, are estimated to be $\$ 42$ million and $\$ 235$ million respectively or approximately $\$ 45$ million and $\$ 90$ million less than the 5 and 10 -year estimates shown above.

## Comparison to Last Year's Projection

In an apples-to-apples comparison over the same 10 year period (2012-2021) between the new projection and the previous projection, the new projection shows:

- a $\$ 65$ million deficit for 5 years, which is $\$ 24$ million lower than the previous projection; and,
- a $\$ 271$ million deficit for 10 years, which is a reduction of $\$ 37$ million from the previous projection.

The five and ten-year projection revenues stay relatively flat while expenses are subject to inflation increases. The current projection estimates a 5 -year deficit of $\$ 87$ million compared to $\$ 89$ million projected last year. However, these deficit projections cover different periods of time. When comparing one year's projection to another, it is difficult to recognize the actual change in the deficit projection unless one focuses on the same period in time. For example, last year's deficit projection for the period of FY 2012 - FY 2016 was $\$ 89$ million. For the same period this year, our current deficit projection is $\$ 65$ million. This $\$ 24$ million improvement is due to the various Financial Plan initiatives approved by the Board and implemented over the past year.

## Capital Contribution

Due to the postponement of various capital projects to future years, the projected capital contribution is the same as the FY 11/12 Adopted Budget and last year's projection. The projected ten-year District capital need is estimated at $\$ 300$ million (See Appendix C). After accounting for funds contributed by depreciation, and the use of $\$ 130$ million in District reserves, the necessary capital contribution from District Operations is $\$ 100$ million or $\$ 10$ million annually for the ten-year period (See Appendix D for detail).

## IV. Assumptions

The assumptions used to build the projection are very important to the findings. Whether the assumption is the inflation rate used to inflate salary and expense costs or the list of capital projects to be undertaken, all assumptions have an impact on the findings. However, a change to any one of the inflation assumptions or capital projects will not dramatically change the findings in this report. Since the projection is neither a policy document, nor a direction for the District, but a status quo baseline to be used to provide a benchmark for future policy decisions, assumptions have been chosen that provide the greatest likelihood that the projection will correctly reflect a status quo future. The major operating revenue and expense assumptions are listed in Appendix B.

## Capital Project Revenue and Expense Assumptions

The FY 12/13 through FY 21/22 Ten-Year Capital Projection, provided in Appendix C, identifies a $\$ 1.2$ billion capital need over the next ten years requiring a District contribution of $\$ 300$ million. This plan has been structured to systematically maintain and sustain existing Bridge, Bus and Ferry capital investments within existing staff resources.

Grants are generally assumed to fund $80 \%$ of Transit rehabilitation and replacement projects, consistent with prior experience, and $80 \%$ of the core Bridge paint and rehabilitation projects. The $80 \%$ grant funding assumption is based on past experience but will be reviewed each year to reflect current experience. All projects have been reviewed and rated essential for the continued operation of the District and the timing of each project balances the operational need for the project with the availability of staff resources to complete the project in a timely fashion. Project costs are inflated $2.2 \%$ in the out-years based on inflation rates.

## Alternative Capital Revenue Assumption Scenarios

Historically the 10-year Capital projections assume 80\% grant funding for major Bridge projects. (See table on the following page for a list of projects.) The Board requested an analysis on what the size of the deficit would be if less grant funding was obtained for these Capital projects. The following is a summary of the results:

| Capital Revenue Assumption <br> Scenarios (In Millions) | Grant <br> Funding <br> Level <br> $\mathbf{8 0 \%}$ | Grant <br> Funding <br> Level <br> $\mathbf{5 0 \%}$ | Grant <br> Funding <br> Level |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 30\% |  |  |  |

These scenarios all assume using approximately $\$ 65$ million of the District's Reserves over a 5year period. The following is a table that lists the assumption of $80 \%$ grant funded Capital Bridge projects:

| BRIDGE DIVISION <br> (All number in thousands) |  |
| :---: | :---: |
| Capital Project Detail | 10 - Year <br> Total |
| Safety/Security Enhancements: |  |
| Facility Improvements |  |
| Seismic Facilities - Suspension Bridge \& Bldg \& Ops Center | \$286,210 |
| Security System Improvements | 3,650 |
| Facilities/Bridge Rehabilitation: |  |
| Suspension Bridge Paint Rehabilitation | 102,370 |
| Floor Beam \& Bracing Replacement/Rehab | 72,800 |
| South Tower Paint Rehabilitation | 50,870 |
| Maintenance/Operations Buildings: Bridge Pavement Repair | 17,050 |
| Grounds: |  |
| Pave \& Maintain Alexander Avenue | 5,780 |
| TOTAL | \$538,730 |

## V. Next Steps

In response to recent financial projections, District staff developed a series of proposed initiatives to address the District's projected financial deficit. In May 2009, the Board established the Financial Planning Advisory Committee, tasked with creating a plan to address the projected financial deficit. The FY 09/10 Financial Plan for Achieving Long-Term Financial Stability (Plan) drafted by the Advisory Committee was approved by the Board on October 30, 2009. This plan is able to balance the District's long-term finances. The District has been implementing a number of Financial Plan Initiatives over the last two years.

The Plan has become part of the Board's regular financial planning cycle and is monitored, reviewed and updated annually with completed, dropped and added initiatives. This year's annual Plan Board review date is scheduled for October 13, 2011.

## Fiscal Impact

There is no direct fiscal impact. The report provides a 10-year projection of the potential fiscal impact of current policy.

Golden Gate Bridge, Highway and Transportation District
Five- and Ten-Year Financial Projection for FY 12/13 - FY 21/22

| CATEGORY | ASSUMPTIONS |
| :---: | :---: |
| General Assumptions |  |
| The FY 11/12 Adopted Budget has been used as the basis for all |  |
| revenue and expense projections |  |

## Operating Revenue

Bus Transit

Ferry Transit

State Funding

Federal Funding

Investment Income

Gift Center Sales \& Café

Bridge traffic remains relatively steady with the downturn in the economy. Vehicle crossings are projected to increase very slightly ( $0.25 \%$ per year). The FY 11/12 Adopted budget and this projection include a toll increase in multi-axle vehicles, which became effective July 1, 2011. No other toll increases are assumed for this projection.

The FY 11/12 Adopted budget and this projection include a 5-year, 5\% per year transit fare increase for Regional Bus routes which became effective July 1, 2011. Based on the District's Planning Department projections, Regional Bus passengers are projected to decrease slightly, offset by a slight increase in Local passengers, resulting in approximately $0.3 \%$ annual increase over the next ten years.

The FY 11/12 Adopted budget and this projection include a slight increase to Sausalito cash fares and Clipper fares. Ferry ridership is projected to increase slightly, approximately $1.5 \%$ per year, based on the District's Planning Department projections.

This projection assumes continuing the contract with Marin Transit or local service @ 5\% increase per year through FY 16/17 in accordance with the 10year contract. No additional increases beyond FY 16/17 are assumed for this projection. No increases to local funding for Regional Measure 2 (RM2) are anticipated per the Metropolitan Transportation Commission (MTC).

All State Transit Assistance (STA) and Transportation Development Act (TDA) funding based on MTC projections.

Assumes minimal Federal funding for this projection.
Interest on investment is projected to be $2.25 \%$ for the first year, increasing slightly to a maximum of $4.5 \%$ based on current rate trends. Projected account balance is net of operating deficit excluding capital contribution and depreciation and includes projected capital spending plan.

This projection assumes that the Gift Center and Café will be turned over to the Golden Gate National Park Conservancy in FY 11/12 and will no longer be a part of the GGBHT District projections.

## ASSUMPTIONS

## Known Changes

Capitalized Labor and Benefits

ICAP (Indirect Cost Allocation Plan)

Commercial Paper Principal

Other Known Changes
Capitalized labor and benefits reflects 50\% Engineering labor charged to capital projects.

ICAP is estimated at approximately 64\% of Engineering capitalized labor expense.

Payments to the Commercial Paper Debt Principal will begin in FY 17/18, following completion of the Seismic Retrofit project. Per the original indenture agreement, projected payments are based on $\$ 1.4$ million in the first year with increases of $\$ 100,000$ per year for the remaining 10 -year period of this projection.

In addition, this projection includes projected cost savings for the following:

1. Cost savings on Commercial Paper debt service expense calculated at the $2.0 \%$ difference between the projected interest rate of approximately $4.0 \%$ and the $6.0 \%$ interest rate cap.
2. Cost savings based on current spending patterns and historical trends assumes approximately $1.5 \%$ salary and related benefit savings due to vacant and temporarily unfilled positions.
3. Cost savings due to implementation of automated ticket vending machines at GGBHT Ferry terminals, resulting in the elimination of four (4) part-time ticket agent positions.

$\left[\begin{array}{cccccc}{[A]+[D]+[E] \$} & 202,100,000 & \$ & 203,800,000 & \$ & 203,800,000 \\ \hline\end{array}\right.$

1. Unrestricted Net Assets is adjusted to exclude Capital Contributions and Bridge Self Insurance set-asides.
2. Board policy funds the operating reserve at $7.5 \%$ of the budget or to cover the expected operating deficit, whichever is larger.
3. Board policy funds the emergency reserve at $3.5 \%$ of the operating budget to enable the amount kept in reserve for emergencies to remain relative to the size of District's operations.
4. Capital Plan Reserve is established each year at $98 \%$ of Total Remaining Reserves Available for Capital Projects or Operations
